SKILLS

Spring Framework	MySQL	Data Science
Java	Python	MicroServices
ReactJS	MongoDB	Github

EXPERIENCE

Software Engineer
Cognizant Technology Solution *Mar 2021 - Present*

1. **Metlife Japan**
   - **Role - Java Backend Developer**
   - Responsible for designing and implementing various microservices for the MetLife Japan web application, following best practices and design patterns.
   - Analyze the existing application, identify components suitable for microservices, and refactor them accordingly.
   - Use Git as a version control system to track and manage code changes effectively and tools like Postman to test API endpoints and validate responses.

2. **Metlife US / Bank Of America**
   - **Role - FullStack (Groovy, ReactJS & MongoDB)**
   - Responsible for developing and maintaining both frontend and backend components of web applications for MetLife US and Bank of America. Work on end-to-end implementation of features and functionalities.
   - Identify and fix UI accessibility issues in the web applications to ensure compliance with accessibility standards (such as WCAG) and make necessary code modifications to improve accessibility.
   - Document technical specifications, architectural decisions, and any specific implementation details. Share knowledge and provide guidance to teammates regarding best practices, code standards, and accessibility guidelines.

Frontend Developer - Intern
Acupace Technology *May 2020 - Jul 2020*
- Role- UI Developer
- Responsibility - UI Development for Video Conferencing Application.
- TechStack - Ionic

EDUCATION

Bachelors of Technology
IES College Of Technology *Jul 2017 - Jun 2021*
Stream - *CSE*

CGPA - *8.46*

PROJECTS

Smart Driving
- Developed Machine Learning Model to detect drowsiness and reduce distractions while driving.
- TechStack - Python, Twilio Platform, Camera Module, Rasberry Pi, Pytts and FacialLandMark Library .
- Won prize @13th ISEC, IIIT Jabalpur

MyShopCart
- An online shopping web application, where user can search and order different category of products.
- TechStack: - Spring, ReactJS, MySQL

Portfolio
- Developed and Deployed my portfolio web application.
- TechStack/ Tool - ReactJS , Netlify
- URL- **https://atulanand-portfolio.netlify.app/**

Lets Connect
- Developed one to one video calling application.
- TechStack - ReactJs, ExpressJS, SocketIO
- Working App :- **https://frabjous-pie-cab044.netlify.app/**

Voice Assistance
- A CLI based application which responds according to the voice commands given by the user.
- TechStack - Python

HOBBIES
